

Biobased Roof Edge Profile Connector

This biobased connector has been developed to connect biobased roof edge profiles 60/80, creating a clean and continuous edge finish for green roofs. The connector ensures a stable and precise connection between the profiles, without clearly visible interruptions. Like the roof edge profile itself, the connector is manufactured from biobased HDPE and designed with a focus on circularity, sustainability, and long service life.

Applications

- For connecting biobased roof edge profiles 60/80
- Provides a stable and clean connection
- Part of a continuous, circular roof edge system
- Suitable for sedum roofs and green roofs

Packaging and Logistics

Bundle packaging: **20 units**

Bundle weight: **0.642 kg**

Packaging: **packaging-free**

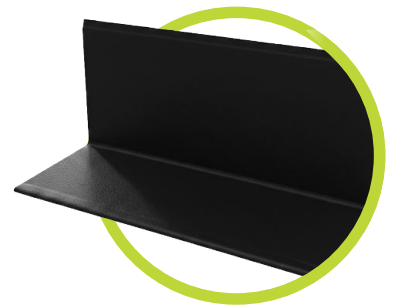

Dimensions:

Length: **10 cm**

Width: **60 / 80 mm**

Height: **60 / 80 mm**

Thickness: **2.7 mm**

Technical Specifications:

Weight: **0.0321 kg per unit**

Colour: **Graphite (RAL 7024)**

Material: **Biobased HDPE**

Warranty: **10 years**

EAN: **8721398837024**
